

# Coverage Detection

Find hidden coverage for self-pay patients to collect the revenue owed to you

Driven by powerful proprietary financial intelligence based on a decade and a half of data from hospitals, health systems, physicians, specialty groups, ancillaries, payers and more, Waystar Coverage Detection makes finding more of that coverage fast, easy and cost effective.

**AWARDS +  
RECOGNITION**

**2020 BEST IN

LEADERSHIP AWARD**

## Identify hidden coverage

Waystar's Business Intelligence Engine processes requests through our technology platform to identify hidden coverage.

Robust repository contains data across the continuum of healthcare equating to billions of transactions that are leveraged for identifying hidden coverage.

**1/8**

patients in  
Waystar's  
repository

**Millions**

of dollars in net billable cash  
uncovered through proven ROI

more coverage  
confirmed

## Confirm if coverage is active

Waystar uses proprietary algorithms to identify coverage on all patient accounts with pre-identified payers confirming active coverage exists. The advanced payer logic leverages over 1,200 payer connections resulting in a superior hit rate.

## Deliver results to collect revenue

Actionable results delivered to client that clearly articulate active and inactive coverage for all patients provided.

Efficiently collect owed revenue by taking action with information delivered in flexible formats.
