Eligibility Verification

Real-time eligibility verification + benefit retrieval that drives value

Patient access staff spend over 50 hours a week assigning accurate eligibility and benefits information to accounts. However the sheer volume of patients makes it difficult to effectively work all accounts, let alone avoid the human error that often leads to denials.

That's why our Eligibility Verification solution is different

Waystar’s Eligibility Verification solution automatically provides real-time eligibility verification and the most comprehensive benefit response available, streamlining workflows and alleviating staff workload. The solution gives your patient access staff an efficient way to get true levels of coverage before and after service by automatically retrieving and combining smart data from payer portals and electronic eligibility transactions (EDI 270/271). It also seamlessly integrates directly into Epic, Cerner, Meditech and other major health information systems.

Automated eligibility verification that provides complete benefits in seconds

Using integrated EDI and payer web portal benefits, Waystar’s Eligibility Verification solution gives you the specific data you need to accurately assess and complete eligibility and benefit verification.

Results

- Easy-to-understand action plan and a streamlined account work list.
- The most accurate and complete benefit plan available at all points of care.
- No more countless hours searching payer websites or calling insurance companies for information verification.
- Staff become specialized, only working accounts with an alert present, which means a higher yield per employee.
- Alerts show when accounts are flagged so accounts are never overlooked.
- A reduction in denials caused by missing or incorrect information.
Meet Hubble, Waystar’s AI + RPA platform that intelligently retrieves expanded benefit data

It’s highly intelligent, nimble and scalable. Waystar’s patented Hubble technology automatically queries, retrieves and merges smart data from payers to present the most comprehensive eligibility and benefit data. Waystar was the first in the industry to intelligently integrate Hubble bot technology into payer and clearinghouse data to not only retrieve a clearer and more expanded picture of a patient’s benefits, but also help providers reduce administrative expenses associated with eligibility denials.
