

Patient estimates for FQHCs

Provide accurate + timely patient financial responsibility estimates

The best way to increase point-of-service collections is to deliver accurate patient estimates during scheduling or at the time of service. For Federally Qualified Health Centers, maximizing patient payments and payer reimbursement is imperative to maintaining a healthy business—so you can focus on delivering care.

Capture more upfront collections with accurate patient estimates

As patient financial responsibility grows due to self-pay or high deductible health plans, it's understandable why providers are seeing a rise in uncollected patient payments. Waystar helps you solve this challenge with our **Patient Estimation solution**—a powerful, automated tool that generates an accurate cost estimate prior to or at the time of service. By combining patient eligibility and benefit details with your chargemaster and contract rates, Waystar delivers the most accurate patient estimates

possible, allowing your staff to focus on upfront cash collection through early patient engagement. Patient Estimation works with major HIS and PM systems, turning basic estimation features into dynamic, reliable intelligence on a patient's true financial responsibility. Explore how Waystar's Claim Management, Coverage Detection and Patient Payments solutions can help FQHCs find and confirm coverage, provide estimates and maximize revenue from both patients and payers.

55%

of patient responsibility is never recovered once a patient leaves a facility

51%

of patients have a deductible of at least \$1000

30%

of revenue is patient financial responsibility

81%

of patients don't understand their out-of-pocket costs
