

# Patient Payments

With Patient Payments, your staff can **immediately process credit card, debit card, check and cash payments** from any computer. They simply log into Waystar's secure web-based virtual terminal, enter payment information, and within seconds the payment is securely processed. Patient Payments generates a printable electronic receipt for each transaction, and receipts can even be delivered to patients by email.

## BENEFITS

**Increase collection rates** by making it easier for patients to pay their obligations

**Improve staff productivity** with more efficient payment processing and card-on-file capability

**Reduce expenses** by auto-posting patient payments, outsourcing low-value tasks and using Patient Payments' lower cost and feature-rich virtual terminal

**Better internal controls** for detailed reporting, audit trails and more

## FEATURES

Waystar is a PCI Compliant Level One Service Provider with a fully compliant virtual terminal. The same process controls and security protocols used by the nation's banks keep your information, and that of your patients, safe and secure. You can store your patients' personal and financial information on file for easy access

### Payments can be accepted through:

- Back office entry (mail or phone payments)
- Integration using API calls
- Patient entry through an online website
- Point-of-care office entry using a simple USB card swipe device
- Single payment or payment plan option

### Forms of payment accepted include:

- Discover®, MasterCard®, Visa® and American Express®
- FSA and HSA cards from a health insurance plan
- Personal checks using ACH check conversion
- Cash and money orders

*Patient Payments puts comprehensive real-time reporting at your fingertips for all payment transactions. And you can access all payment and patient data from any PC for two years.*
