

# Simplify telehealth billing + validate patient coverage

Billing for telehealth services is complicated. Every commercial and government payer has different billing rules for virtual care, and those rules are changing rapidly. You need a partner who understands your unique challenges and knows how to help you solve them.

## Get detailed patient coverage information

It's a new day in telehealth. Restrictions have loosened across the country and patients have grown accustomed to the convenience and flexibility virtual care provides. In fact, the volume of telehealth claims on the Waystar platform increased by 100x during the height of the pandemic.

Revenue cycle leaders must be able to closely monitor telehealth claims to identify rejections, appeal denials and ensure timely payment. Waystar takes manual intervention out of this process, freeing up staff to focus on more important tasks.

### With Waystar, your organization can:

- **Automate the search for commercial and Medicare coverage**, eliminating manual work and maximizing the percentage of revenue billed to payers
- **Monitor claim rejections** and denials
- **Identify denial trends** by employee, biller specialty or provider
- **Ensure accurate claim codes are being used** to maximize reimbursement
- **Interpret and share** key telehealth metrics with pre-built dashboards
