

Transfer DRG

Almost half of all Medicare discharges are coded as transfer DRGs. While your hospital works to recover transfer DRG underpayments, it may not find 100% of them. Start capturing all your underpayments today with Waystar.

An accurate, reliable service you can count on.

Identifying Medicare transfer DRG underpayments can be a costly challenge. Underpayments can occur when a patient is discharged as a transfer, but doesn't receive the expected post-acute care. Unfortunately, it's your hospital's responsibility to identify claims that failed to transfer and recuperate payment that's rightfully yours. Even if your hospital uses another transfer DRG recovery service, Waystar's Transfer DRG can review additional underpayments when performing primary, secondary or even tertiary reviews.
